Details:

This private residential complex with a total of 69 highly-modern apartments is under construction only a few minutes walk from the Es Trenc beach. The communal areas contain a large saltwater pool, Mediterranean-style landscaped gardens and a fitness studio. A heat-pump provides clean renewable energy, which powers the air-conditioning units fitted in all buildings and assuring pleasant temperatures all year round.

The first construction phase includes 4 buildings, each with 8 residential units, and is currently under construction with completion foreseen for 2024. Five more buildings will be built in the second construction period.

Foreseen are the following living units:

Ground floor 94,00 sqm 2 bedrooms 490.000 Euro

Ground floor 115,00 sqm 3 bedrooms 598.000 Euro

Upper floor 94,00 sqm 2 bedrooms 648.000 Euro

Upper floor 115,00 sqm 3 bedrooms 698.000 Euro

All ground-floor apartments will have a covered terrace and the upper floor units a balcony plus a roof terrace.

Differing floor layouts are planned, and we will be pleased to provide further information concerning this if required.

High quality construction materials will dominate in these excellent apartments, and all will be equipped with hot/cold air conditioning, with underfloor heating in the bathrooms.

Each apartment has its own parking space, with charging stations for e-cars, the energy for which will be provided by photovoltaic systems which will be installed over the entire upper surface of the carports.
